-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2133

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference characters not mentioned in the description: S501 through S510 (Fig. 20), S1001 through S1004 (Fig. 26), S1201 through S1204 (Fig. 29), S2501 through S2505 (Fig. 45), 1106, (Fig. 34), 3741a through 3743 (Fig. 36), S2501 through S2505 (Fig. 45), 4108 (Fig. 47). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Figures 13 and 14 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The listing of references in the specification, at page 4 lines 14-16, is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Art Unit: 2133

The incorporation of essential material in the specification by references to Japanese Patent Laid-open Publication No. 11-831661 and Japanese published patent application 2002-521789 are improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

Claims 29-30 and 93-102 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. These claims recite a use for the combinations of the parent claims, but do not further restrict the combinations of said parent claims.

Claims 1-28 and 31-92 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takagi *et al.* (2004/0257900) shows recording a data stream having interleaved first and second error correcting codes, Hashimoto *et al.* (JP 09139026) teaches a system where reproduced data is stored in a first memory and a detection result of an error detector is stored in a second memory, Chiyouzaku (JP 11110920) shows the interleaving of data and error correcting codes in optical recording.

The following is a statement of reasons for the indication of allowable subject matter: none of the cited references teach or fairly suggest permitting transfer of data from a first to a second memory based on the amount of data that has been stored in the first memory as in applicants' independent claims 1, 9, 17 and 23 or interleaving (or deinterleaving) first and second codeword sequences and a synchronization code as in applicants' independent claims 31, 33, 34, 42, 44, 45, 54, 55, 58, 59, 62, 64, 65, 73, 75, 76, 85, 86, 89, and 90.
